

PRODUCT INFORMATION SHEET

Clean-Flex

What is Clean-Flex?

Clean-Flex, Greenaway's CDA cleanser is a fully bio-degradable synergistic blend of emulsifiers and natural citrus oils specifically formulated for cleaning and neutralising the Greenaway System range or any other CDA lances after usage and before changing from one herbicide to another.

Contents of Clean-Flex

Contains a blend of non-ionic and surfactants with sequestrants and a naturally derived solvent.

When to Use Clean-Flex

Clean-Flex should be used whenever the equipment is to be left after being used for any length of time to prevent clogging and to ensure neutralisation of equipment before selecting an alternative CDA product. Also for use in rinsing and washing out containers prior to their safe disposal.

How much Clean-Flex to Use

Clean-Flex should be allowed to flow through the equipment until the Clean-Flex leaving the spray head is clear.

Safe Use of Clean-Flex

1. Wash Clean-Flex from skin or eyes immediately.
2. Do not ingest or allow prolonged contact with skin.
3. Keep away from food and drink.
4. Keep out of reach of children.
5. Ensure cleaning is done where no contamination damage can occur.

The Greenaway System is successfully established in over 300 Local Authorities, Government Agencies and Industrial Contractors.
