

## **PRODUCT INFORMATION SHEET**

# **Gly-Flex™**

### **General Information**

Gly-flex is an approved biodegradable vegetable oil emulsion adjuvant specifically formulated to be used in conjunction with Greenaway Gly-490 Glyphosate, producing an excellent non-residual CDA total herbicide which may be used through the Greenaway range of CDA equipment for the control of emerged perennial and annual grasses and broad leaved weeds. (See pesticide label for further details.)

### **Areas of Use**

Gly-Flex when combined with Greenaway Gly-490 Glyphosate as per manufacturer's instructions may be applied to:

- Hedgerow bottoms, fences, walls and around buildings.
- Roadways, pathways and hard surfaces.
- As a directed application in ornamental plantings, forestry, site preparation and post-planting treatments.

### **When to Apply**

Gly-Flex, when combined with Greenaway Gly-490 Glyphosate should be applied when the weeds are fully emerged and are actively growing. Couch grass and perennial grasses should have 4-5 leaves and should be 10-15cm (4-6ins) in length. Annual broad-leaved weeds should be at the 2 true-leaf stage or beyond. Annual grasses should be at the 1 leaf stage or beyond. Perennial broad-leaved weeds should be treated after the flowering stem has become well grown.

### **Rates of Use**

In all situations apply, when mixed at 10lts/ha through the Greenaway range of CDA applicators.

### **Legislation**

Gly-Flex conforms to current legislation concerning Herbicide and Pesticides, and is approved for use as directed with approved Greenaway Gly-490 Glyphosate.

ADJ. No. 0588
