## **PRODUCT INFORMATION SHEET**

# **Meco-Flex™**

### **General Information**

Meco-Flex is a biodegradable oil emulsion carrier specifically formulated to be used in conjunction with Headland Relay P, Headland Relay Turf, ReAct, or Depitox.

When combined to the correct formulations, with Headland Relay P, Headland Relay Turf, ReAct, or Depitox, an excellent CDA selective herbicide is produced which is effective for the control of a wide range of broad-leaved weeds including Ragwort in established turf. (See pesticide label for further details.)

### **Areas of Use**

Meco-Flex, when mixed with Headland Relay P, Headland Relay Turf, ReAct, or Depitox as per manufacturer's instructions, may be used on established turf and other grass areas to control broad-leaved weeds.

### **When to Apply**

For the best results, the grass and weeds should be actively growing at the time of treatment. In most years, treatment during the early part of the season is recommended, although spraying at any time between April and September will be effective except during drought conditions.

### **Rates of Use**

In all situations apply, when mixed at 10lts/ha through the Greenaway range of CDA applicators.

### **Additional Information**

When mixed and applied in accordance with the manufacturers instructions, Meco-Flex will provide the user with an economic selective herbicide to apply through the Greenaway System range of CDA equipment. This formulation complies with the MAFF Code of Practice for Reduced Volume Spraying.

Only MAFF approved products may be used in conjunction with this product.

ADJ. No. 0678

**NOTES:-** MECO-FLEX IS NOT A PESTICIDE  
ALWAYS READ THE LABEL  
USE PESTICIDES SAFELY
