

PRODUCT INFORMATION SHEET

Pik-Flex™

General Information

Pik-Flex is an approved biodegradable vegetable oil emulsion adjuvant specifically formulated to be used in conjunction with Tordon 22k, producing an excellent CDA selective herbicide which may be used through the Greenaway range of CDA equipment for the control of tough woody weeds, scrub and deep rooted perennials. It also tackles difficult weeds such as Japanese Knotweed, Ragwort and Docks. (See pesticide label for further details.)

Areas of Use

Pik-Flex when combined with Tordon 22k as per manufacturer's instructions may be applied to:

- Pathways and central reservations and embankments.
- Railway sidings, branch lines.
- Fence lines and around buildings.

When to Apply

Pik-Flex, when combined with Tordon 22k should be applied to railway sidings or road edges during the winter months or early spring. For grassy areas such as embankments best results are obtained during periods of vigorous growth. Grass is not affected. (See herbicide label for further details.)

Rates of Use

In all situations apply, when mixed at 10lts/ha through the Greenaway range of CDA applicators.

Legislation

Pik-Flex conforms to current legislation concerning Herbicide and Pesticides, and is approved for use as directed with approved Tordon 22k.

ADJ. No. 0681
