PRODUCT INFORMATION SHEET

Pryz-Flex™

General Information

Pryz-Flex is a biodegradable oil emulsion carrier specifically formulated to be used in conjunction with Kerb Pro Flo or Kerb Flo, producing an excellent CDA winter applied soil acting residual herbicide. (See pesticide label for further details).

Areas of Use

Pryz-Flex when combined with Kerb Pro Flo or Kerb Flo as per manufacturers instructions, may be applied to forest trees at any stage (either at planting, pre or post planting), ornamental trees and shrubs which have been planted in their final position for at least one season, (when planted in Spring they may be treated the following Autumn), around obstacles, street furniture and lighting and in cemeteries, around gravestones and memorials.

When to Apply

Pryz-Flex when combined with Kerb Pro Flo or Kerb Flo should be applied from October to the end of February. However better results will be obtained if the product has spent several weeks in the soil prior to the growing season, The product requires moisture for root uptake and good residual action will be obtained in moist cold soils.

Rates of Use

In all situations apply, when mixed at 10lts/ha through the Greenaway range of CDA applicators.

Additional Information

When mixed and applied in accordance with the manufacturers instructions, Pryz-Flex will provide the user with an economic residual herbicide to apply through the Greenaway System range of CDA equipment.

Only MAFF approved products may be used in conjunction with this product.

ADJ No. 0679

NOTES:- PRYZ-FLEX IS NOT A PESTICIDE
ALWAYS READ THE LABEL
USE PESTICIDES SAFELY
